

In the Specification:

Please replace paragraph [56] as follows:

[56] The language code or codes indicate the language or languages, which the user wishes to view on the display of the caller ID device. Whenever a calling party's language ID corresponds to one of the selected languages, that caller's local name will be displayed on the caller ID device. In other words, the stored language codes are retrieved in step S118 of Figure 3, and used in the comparison of step S120 of Figure 3.
